The solar container communication station battery pack is connected in parallel

Overview

The correct way of connecting multiple batteries in parallel is to ensure that the total path of the current in and out of each battery is equal. Connect using positive and negative posts. Set Up Parallel Communication Each Solis hybrid inverter features two RJ45 communication ports -- Parallel A (left) and Parallel B (right) -- used exclusively for parallel communication via the CAN protocol. All communication cables only need to be connected to the master. point to eliminate the possibility of a voltage potential existed between. This Manual describes the requirements and installation procedures for SBR battery parallel configuration. * Images are for reference only. The actual products received may differ. When setting up lithium solar batteries, understanding how to connect them in series or parallel is crucial for.
