Top selling electric cars in germany

Overview

According to market researcher Dataforce (via Automotive News), Volkswagen Group dominated Germany's EV sales, accounting for eight of the top ten best-selling EVs in the first half of 2025. 7 surprisingly took the top spot, selling 18,017 units. 2024 (January to December 2024): Battery-electric car sales in Germany contracted by 27. That's a stark difference from the first. In Europe, when it comes to cars, attention inevitably turns to German cars, particularly those made by renowned manufacturers such as Mercedes-Benz, BMW and Porsche. Ever since Carl Benz created what is recognised as the first motor vehicle, Germany has maintained its reputation for consistent. The German automotive market continues to lead Europe in the adoption of electric vehicles (EVs). In 2024, EV sales have seen significant growth, driven by government incentives, improved charging infrastructure, and a strong consumer push towards sustainability 2. In the first four months of the year, BEV registrations jumped by 43%, reaching 158,503 units — already more than 60% of the full-year total in 2024.
