ROME (AP) — Italy agreed Thursday to a Vatican plan to turn a 430-hectare (1,000-acre) field north of Rome, once the source of controversy between the two, into a vast solar farm that the Holy See hopes will generate enough electricity to meet its needs and turn Vatican City. On July 31, at the historic Palazzo Borromeo, the Holy See and the Italian Republic signed a landmark agreement to build an agrivoltaic system in Santa Maria di Galeria. Photo: Vatican Media According to the Vatican's press office, the installation will apply the most advanced solutions currently. Most people would not expect the world's smallest country, with fewer than 1,000 residents, to lead the global energy conversation. In 2025, the Vatican City flipped the switch on something much bigger than its size. A full transition to solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside Rome. The 1000+ acre site is a good match for the agrivoltaic plant, as it was already the location for Vatican Radio transmission facilities for digital broadcasting. Now the new plant can. In line with the principles of the encyclical 'Laudato Si' and a United Nations agreement on climate change, Pope Francis is making the Vatican "greener.
