Overview

There are now 24 community energy hubs across Victoria that are equipped with solar panels, batteries and generators that provide power back up during a severe storm event and help to keep essential services running during prolonged power outages. Our team helps Victoria residents plan, install, and maintain safe backup power systems for any emergency. This article explains the real benefits of owning a generator —from peace of mind to long-term savings. It runs on natural gas or liquid propane (LP) fuel, and sits outside just like a central air conditioning unit. A home backup generator delivers power directly to your home's electrical system, backing up your. With a permanently installed backup generator your home or business is protected ensuring that you can continue to keep the heat on, keep the cooling on, keep the fridge and freezer on, open your garage door and even watch your favorite shows.
