

# **Vietnam outdoor power supply procurement**

## Overview

---

This article breaks down what's changed, what's still in progress, and what global buyers need to watch as Vietnam moves toward implementation in 2025. Insights in this report leverage six years of in-depth work that Allotrope has led in Vietnam to grow networks of in-country stakeholders, cultivate market-level knowledge, and deliver technical support to advance first-in-market clean energy procurement and decarbonization. For comparison, the average production and purchase cost of electricity for Vietnam Electricity (EVN) (with coal-fired and gas-fired power accounting for 55% of total electricity generation) is around \$0. The Ministry of Industry and Trade (MOIT) projects electricity demand to grow by 10–12% under normal conditions, and up. Vietnam's battery outdoor power supply sector has become a focal point for industries ranging from renewable energy to emergency infrastructure. On July 3, the Vietnamese government issued a decree on direct power purchase agreement (DPPA) that allows enterprises to purchase renewable energy from private producers without. The outdoor camping power supply market is experiencing significant growth driven by increasing outdoor recreational activities, technological innovations, and a rising demand for portable, reliable energy solutions among camping enthusiasts and adventurers worldwide. As consumers seek sustainable.
