# **West africa solar energy storage project**

## Overview

---

Independent power producer Africa REN has commissioned a solar-plus-storage project in Senegal. The Walo Storage project is the first solar installation in West Africa to include energy storage dedicated to frequency regulation. The West African nation, where over 60% of the population have access to electricity—one of the highest in the sub region—aims to achieve universal energy access by 2030. The €40 million project includes a 16 MW photovoltaic plant paired with a 10 MW/20 MWh. Axian Energy, Voltalia, and Entech have announced the signing of an EPC (Engineering, Procurement, and Construction) contract for Senegal's NEA Kolda project. It is the largest photovoltaic power plant with battery energy storage systems (BESS) in West Africa.
