# **What are the new energy storage standards**

## Overview

---

The 2026 edition of NFPA 855: Standard for the Installation of Stationary Energy Storage Systems has now been released, continuing the rapid evolution of safety requirements for battery energy storage systems (BESS). Since the first edition in 2020, each cycle has refined how the standard addresses. Thermal energy can be stored in sensible, latent, or chemical form. The storage of industrial quantities of thermal energy is in a nascent stage and primarily consists of sensible heat storage in nitrate salt eutectics and mixtures. Key organizations setting standards are the Institute of Electrical and Electronics Engineers (IEEE) and the.
