

What is the warranty period for photovoltaic panels

Overview

Solar panels generally come with two warranties: The product warranty covers the equipment and typically guarantees at least 10-12 years without fail, and the power or performance warranty often guarantees at least 90% production at 10 years and 80% at 25 years. A standard solar panel warranty should come with at least 10 years of protection, though many premium options now offer 25 or even 30+ years of coverage. Product warranties guarantee free part replacements in case of a defect or malfunction. An efficiency warranty, which provides a maximum degradation rate per year after installation. This is standard for most panels. Whether it's a manufacturing defect, a sudden performance drop, or wear and tear over time, you want to be protected.
