

What should I do if I don't want to install photovoltaic panels

Overview

This article will take you through some of the innovative ways for getting solar power without putting panels on your roof.  If you prefer not to install solar panels at your residence, there are numerous alternative options that can assist in managing energy costs and enhancing energy. The need for energy is always constant and growing in this modern age and the available non-renewable sources of energy in use currently are estimated to run out faster than the time it will take to replenish it. To help all solar customers understand their options, the Solar Energy Industries Association (SEIA) has outlined a number of ways Americans can benefit from solar savings without putting solar on their roof. Community solar is a great option for most Americans that can't or don't want to install. Whether solar panels are worth it depends on where you live, your budget, your roof's characteristics, incentives, and how much energy you use. Before proceeding, check local zoning laws and HOA rules to ensure compliance. Also, consider potential.
