# **What size and model are the photovoltaic panels**

## Overview

---

Q1: What are the standard dimensions of a solar panel in 2025?

A1: For homes, it's about 1. For commercial projects, around 2. Q2: Do bigger panels mean better performance?

Not always. While “size” refers to power output (measured in watts), “dimensions” refer to the physical measurements of the panels themselves. Alright, your roof square footage is 1000 sq ft. Can you put a 5kW solar system on your roof?

For that, you will need to know what size is a typical 100-watt solar panel, right?

To bridge that gap of very useful knowledge needed. The size of solar panels with the same cell count varies slightly, depending on the brand and model. Still, most 60-cell solar panels have a size of 39” X 66” and most 72-cell solar panels have sizes of around 39” X 77”.
