## Overview

---

But it can be easy to make mistakes when you are configuring and installing your solar system. To prevent unnecessary hassle and expense, we've compiled this guide to common regrets homeowners have after they have gone solar, and how to avoid them. EnergySage has your back with free and transparent quotes from fully vetted providers in your area. Let me start with the beginning. I did not do my due diligence when the solar salesman approached us. We were approved for a. Please post the size of your system, number of microinverters, model, panel wattage, etc. I have an Enphase 20,000-Watt AC system I installed in 2013, and I hit my ROI in 7 years. your installer needs to fill out a distributed generation agreement with duke energy. Common Regrets After Purchasing Solar Panels, is something many homeowners share after making hasty decisions or failing to consider all factors involved with going solar. From choosing poor-quality panels, underestimating maintenance costs, ignoring local utility rules to not understanding tax. What direction are the panels facing, and what is the angle from horizontal that they are mounted at?

And your pge bill just shows if you are net using or sending power, it does not seem to indicate how much the panels are really producing.
