

# **What types of adjustable power supplies are there for base stations**

## Overview

---

Type: You will find two main types of power supplies – linear and switching. When selecting UPS (Uninterruptible Power Supply) power supplies for base stations, several factors need to be considered to meet the specific requirements of these applications. Here's a guide to help you make the right choice: 1. The switch-mode supply of power is smaller and lighter as compared to the linear power. When choosing a power supply for your radio setup, you'll encounter two main types: linear and switching (or switch-mode) power supplies. This setup provides both 24V and 5V low voltage outputs, while aPRM regulatorandVTM current multiplier cater to.
