

# World solar challenge race

**ESS**

## Overview

---

The course is over 3,022 Kilometers (1,878 miles) through the Australian outback, from Darwin in the Northern Territory to Adelaide in South Australia. The event was created in 1987 to encourage the development of solar-powered vehicles [2] and has been held fifteen times over its. More competitors finished than in 2023 - an outstanding result considering the new winter timeslot, less sun and strong winds. Catch up on daily updates and the final event wrap. Catch up on YouTube Shorts or watch the 2025 Awards Ceremony Viewed over 3 million times - this documentary shows the. The World Solar Challenge (WSC), named the Bridgestone World Solar Challenge since 2013, [1] is an international event for solar powered cars.

## World solar challenge race

---

### World Solar Challenge

o The timed portion of the challenge stops at the outskirts of Adelaide, 2998 km from Darwin. However, for the timings recorded at that point to count, competitors must reach the official finish line in the centre of the city under solar power alone. o As the challenge utilises public roads, the cars have to adhere to the normal traffic regulations.
