World wind power generation in 2025

Wind Power by Country 2026

While this rate of expansion still falls short of the global "Net Zero ...

GWEC'S Global Wind Report 2025: Record Growth, Emerging ...

The 2025 Global Wind Report shows global wind capacity reaching 1,136 GW, with 55 countries adding new turbines in 2024. China led new installations, followed by the USA, Germany, ...

WWEA Half-year Report 2025: Global Wind Power Growth ...

The first half of 2025 has been a defining period for the global wind energy sector - not only for its record-breaking growth but for the clarity it provides about the world's energy direction.

Renewable energy statistics 2025

Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy balances for over 150 countries and areas for ...

Global Electricity Mid-Year Insights 2025 , Ember

Global electricity demand grew by 2.6% (+369 TWh) in the first half of 2025. This increase was more than met by increases in solar (+306 TWh, +31%) and wind (+97 TWh, +7.7%) generation, ...

Solar and wind are covering all new power demand in 2025

Solar and wind are growing fast enough to meet all new electricity demand worldwide for the first three quarters of 2025, according to new data from energy think tank Ember.

Wind power generation, 2025

Wind power generation, 2025 Annual electricity generation from wind is measured in terawatt-hours (TWh) per year. This includes both onshore and

offshore wind sources.

the future of wind energy: insights from the gwec global wind report 2025

In this blog, we explore key findings from the report alongside our 2025 market predictions to offer a forward-looking view of the wind energy sector, where it stands today and what's next.

GLOBAL WIND ENERGY COUNCIL

for the global community. The journey of wind energy has been nothing short of remarkable, evolving from a niche technology to a mainstream source of power that is now integral to our stands ready to ...

GLOBAL WIND REPORT 2025: China accounts for 70% on new ...

Foreseeing a promising future for wind energy, GWEC projects new installations will exceed the previous record, reaching

139 GW in 2025. Under current policies, a total of 981 GW of new capacity ...

Wind Power by Country 2026

While this rate of expansion still falls short of the global "Net Zero Emissions by 2050" target, it offers a clear signal that global investment in wind power is rising. This growth also enabled a record ...
